### About Hammersley Homes

Established in 2018, Hammersley Homes is a charity that provides support for life, for vulnerable adults who live with enduring mental health challenges and psychotic illnesses. Our aim is to establish a nationwide network of Day Centres, Outreach Services and Supported Housing schemes. We focus upon increasing people's quality of life, whilst decreasing the likelihood of relapse into a mental health crisis. Implementing ongoing support provides an opportunity to notice if there is any notable decline in the person's health or wellbeing.

### About the Outreach Home Visiting Programme

The Outreach Home Visiting Programme was set up to support people living with long term mental illness who may be suffering from the debilitating effects of chaotic lifestyles, loneliness and/or social isolation. The main aim of this service is to provide 'in person' support to clients living in their own homes and out in the community. Volunteers can help clients to access services and support which they struggle to access by themselves.
